

Middle School Career Investigations Park Games Introduction

Meet Tracy

MAKAYLA: Wow, look at all of these games!

CALEB: How in the world does Commonwealth Cascades get so many games for their park?

TRACY: Hello, my name is Tracy. I overheard you two talking about the games here at Commonwealth Cascades. Believe it or not, there's a lot that goes into getting amusement park games ready for fun!

MAKAYLA: Like making sure the games work the right way?

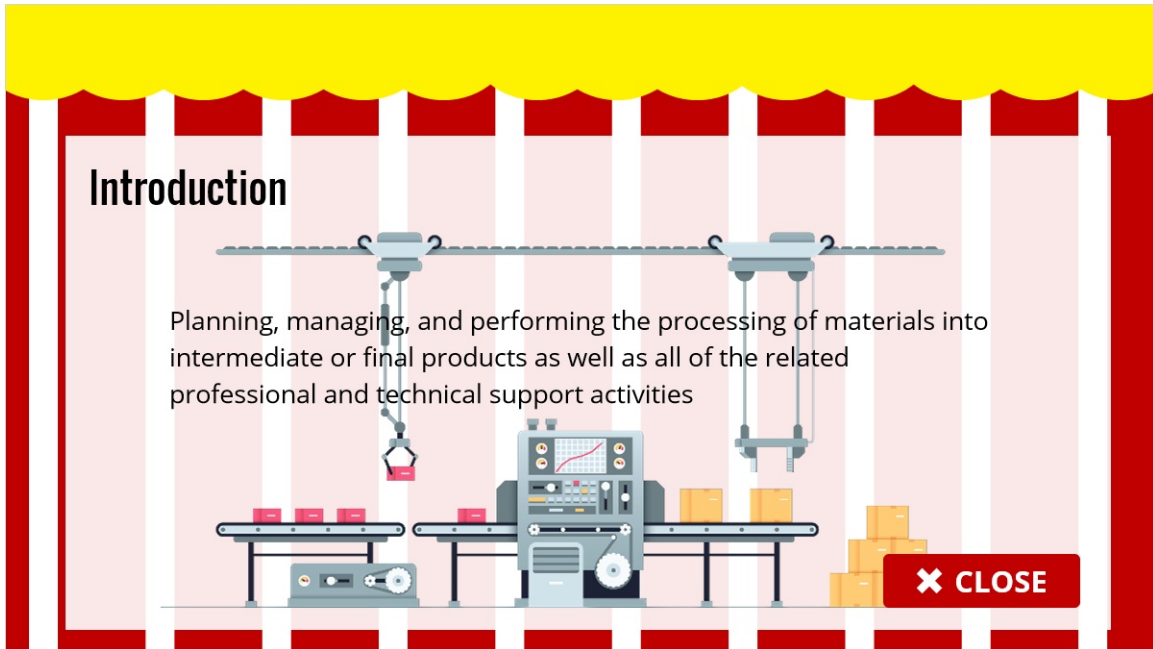

TRACY: Yes, and so much more! I work as an Instrument Control Technician for the manufacturing company that makes the games for Commonwealth Cascades.

CALEB: What else goes into making the games for the park?

Middle School Career Investigations

Park Games Introduction

Introduction

TRACY: Manufacturing has a lot of components. There are a bunch of people involved in the Manufacturing Career Cluster who make sure Commonwealth Cascades has great games for you to play. The basis of manufacturing jobs is to plan, manage, and perform the processing of materials into intermediate or final products as well as all of the related professional and technical support activities that help us get the job done. Try one of these games and I can tell you more.
