Module 7: Solving Linear Inequalities
Authentic Assessment: Pizza Party Presentation Rubric

	25 Points	20 Points	10 Points	0 Points
Content	The presentation includes all of the required information and demonstrates a thorough understanding of the process to solve practical problems involving systems of linear inequalities.	The presentation is missing one to two pieces of information. The information provided demonstrates an understanding of the process to solve practical problems involving systems of linear inequalities.	The presentation is missing three to five pieces of information. The information provided demonstrates minimal understanding of the process to solve practical problems involving systems of linear inequalities.	The presentation does not include any of the required information. The information provided demonstrates no understanding of the process to solve practical problems involving systems of linear inequalities.
Layout	The layout of the presentation is extremely organized and visually appealing. The layout includes color and/or images that enrich the content.	The layout of the presentation is organized. The presentation is visually appealing, but lacks additional color and/or images that could enrich the content.	The layout of the presentation is moderately organized. The presentation is slightly visually appealing, but lacks additional color and/or images that could enrich the content.	The layout of the presentation is confusing. The presentation is not visually appealing and lacks additional color and/or images that could enrich the content.
Accuracy	There are no errors included in the computations and/or graphs.	There are one to two errors included in the computations and/or graphs.	There are three errors included in the computations and/or graphs.	There are four errors included in the computations and/or graphs.
Justifications	All responses are justified by algebraic, graphic, and/or verbal explanations.	Most responses are justified by algebraic, graphic, and/or verbal explanations.	Some responses are justified by algebraic, graphic, and/or verbal explanations.	No responses are justified by algebraic, graphic, and/or verbal explanations.
