

Module 6: Ocean Water Chemistry

Topic 2 Warm Up: Dissolved Elements in Ocean Water Notes

You may already know that seawater contains salt, but do you know what other dissolved substances are in seawater? Read the list of possible dissolved elements in seawater. Then, hover your cursor over the image to see what dissolved elements are actually found in seawater. Did you get them correct?

Possible Dissolved Elements:

Sodium Chloride

Chlorine

Calcium

Potassium

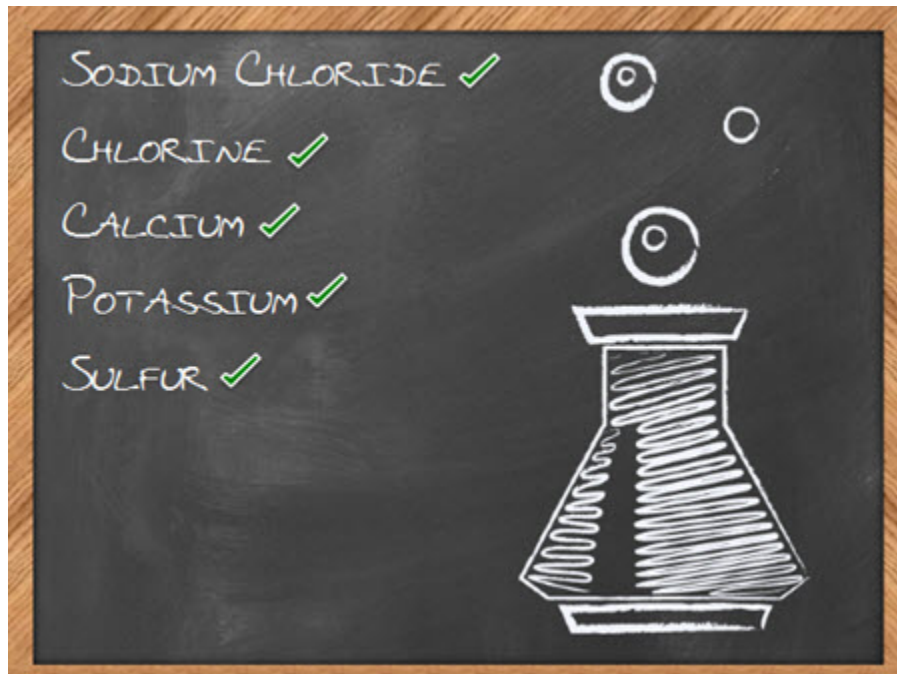

Sulfur

Cobalt

Uranium

Indium

Module 6: Ocean Water Chemistry
Topic 2 Warm Up: Dissolved Elements in Ocean Water Notes

Correct Dissolved Elements:

Sodium Chloride

Chlorine

Calcium

Potassium

Sulfur
