Module 2: Biological Basis of Behavior
Authentic Assessment: Neuron and Brain Models Rubric

	20 Points	15 Points	10 Points	5 Points
Originality and Creativity of Models	Both models demonstrate originality and creativity.	Both models are moderately original and creative.	Both models lack originality and creativity.	Neither model displays originality or creativity.
Neatness of Models and Labels	Both models are neat. All labels are neat and legible.	Both models are moderately neat. The labels are somewhat neat and legible.	Both models are somewhat neat. Many labels are not neat and illegible.	Neither model is neat, and labels are largely missing or illegible.
Accuracy of Labels	All labels for both model components are accurate.	Labels for both model components are generally accurate. No more than three components are mislabeled.	Labels for both model components demonstrate incomplete understanding. No more than seven components are mislabeled.	Labels for both model components are not included or largely incorrect. More than seven components are mislabeled.
Accuracy of Model Components	All model components are accurately displayed.	Most model components are accurately displayed. No more than three components are missing or incorrect.	Components of both models have many inaccuracies. No more than seven components are missing or incorrect.	Components of both models are missing or incorrect. More than seven components are missing or incorrect.
Accuracy of Function Descriptions	All functions are described accurately.	Most functions are described accurately. No more than three have errors.	Many functions have inaccurate descriptions. No more than five have errors.	Most functions have inaccurate descriptions. More than six have errors.
