World Geography Course Overview

GEOTREX Office

BRANDON: Hello! We wanted to be the first to welcome you as an official GEOTREX intern. I'm Brandon, the Editorial Supervisor here at GEOTREX.

SATYA: I'm Satya, the Global Travel Director. It's nice to finally meet you!

World Geography

Course Overview

GEOTREX Goals

SATYA: Our goal at GEOTREX is to give people the chance to digitally explore and understand the physical, cultural, and economic geography of our planet. We provide an experience for many people who may not have the opportunity to travel. As a GEOTREX intern, you will document your travels, and develop creative ways to share your experiences with other people.

World Geography Course Overview

GEOTREX Internship

We received hundreds of applications for our internship program, and out of all those, your application really stood out.

BRANDON: We received hundreds of applications for our internship program, and out of all of those, your application really stood out. We are excited to see the work you will produce during your yearlong internship.

World Geography Course Overview

GEOTREX Internship (continued)

BRANDON: We will be offering a little guidance, but ultimately you will be responsible for creating content for GEOTREX's social media pages. We encourage you to share your images, videos, memories, and opinions with the world regarding various aspects of world geography.

SATYA: Throughout the year, Brandon and I want you to be as creative as possible when you post about your travels.

World Geography Course Overview

GEOTREX Internship (continued)

BRANDON: People reading your social media posts will not be traveling with you, and they want to learn about world geography in an interesting, fun, and authentic way.

World Geography Course Overview

GEOTREX Internship (continued)

SATYA: Make sure all of your travels are documented in an inclusive and friendly way, and that you also maintain appropriate etiquette.

World Geography Course Overview

Geography Research

SATYA: Before you begin your adventure as a GEOTREX intern, you are required to research physical, cultural, and economic geography. This research will help you understand the different regions you will visit during your trip.

World Geography

Course Overview

Travel Destinations

BRANDON: After you complete your research, you will get to start traveling through the United States and Canada, followed by Latin America, Europe, Russia and Central Asia, North Africa and Southwest Asia, Sub-Saharan Africa, South Asia, Southeast and East Asia, and finally, Australia and the Pacific Islands.

Student Resources

WORLD GEOGRAPHY

Student Resources

In this supplementary section, you will find resources and documents to help you navigate through this course. If you need extra help with an assignment, click on the links below.

Course Icons and Glossary

You can access the [course icon library](#) for definitions of each icon used in this course.

 The [course glossary](#) contains the definitions for the terms listed on each Module Overview page. Click on the course glossary link on each Module Overview page to access the course glossary.

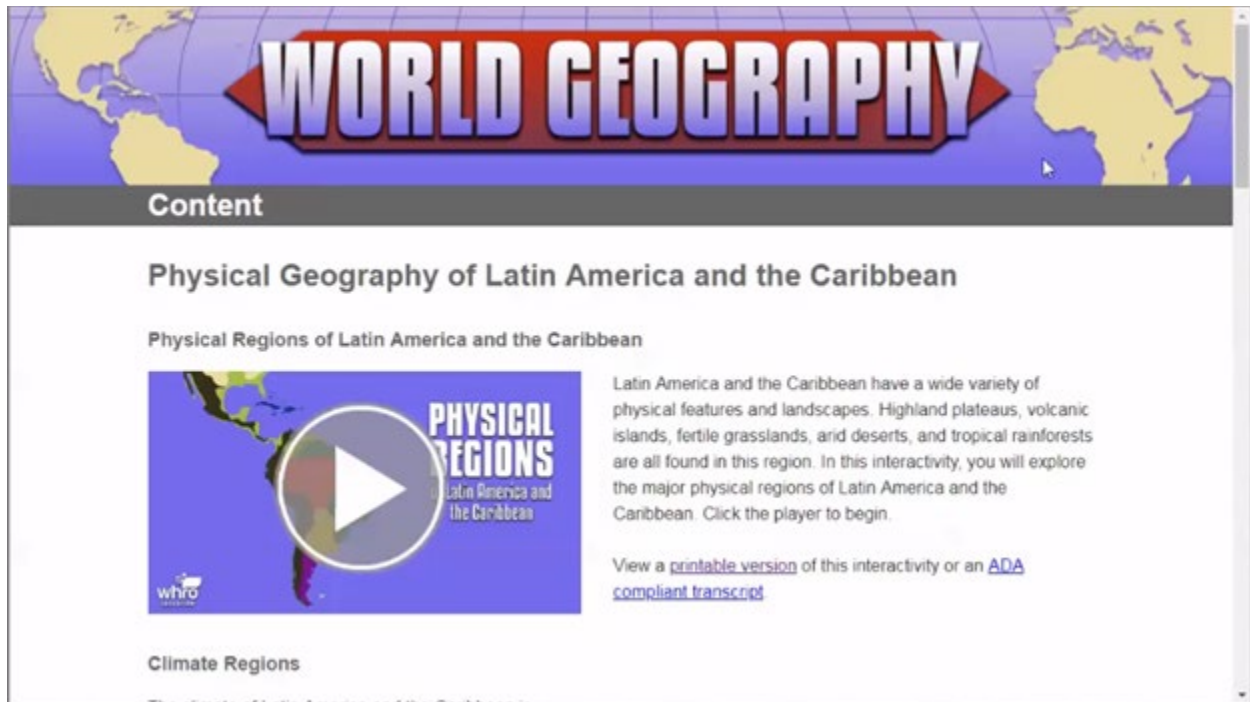

How to Resources

This section contains procedures for some tasks you may be required to perform on your computer in order to complete this

SATYA: The first area you should know about is the Student Resources section. This page is filled with resources you can use to help you with assignments and projects. It also includes helpful links filled with information about World Geography.

World Geography Course Overview

Course Structure

The screenshot shows a web page titled "WORLD GEOGRAPHY" with a "Content" section. The main heading is "Physical Geography of Latin America and the Caribbean". Below this, there is a sub-heading "Physical Regions of Latin America and the Caribbean". A video player thumbnail is visible, featuring a map of Latin America and the Caribbean with a play button and the text "PHYSICAL REGIONS Latin America and the Caribbean". To the right of the video player, there is a paragraph of text describing the physical features and landscapes of the region. Below the text, there are two links: "View a [printable version](#) of this interactivity or an [ADA compliant transcript](#)". At the bottom of the page, the heading "Climate Regions" is visible.

Content

Physical Geography of Latin America and the Caribbean

Physical Regions of Latin America and the Caribbean

Latin America and the Caribbean have a wide variety of physical features and landscapes. Highland plateaus, volcanic islands, fertile grasslands, arid deserts, and tropical rainforests are all found in this region. In this interactivity, you will explore the major physical regions of Latin America and the Caribbean. Click the player to begin.

View a [printable version](#) of this interactivity or an [ADA compliant transcript](#)

Climate Regions

SATYA: You will notice that every topic has the same sections. You will spend time in each section, starting with the Introduction page. The Content page is where you will focus a majority of your time. Here you will go through various interactivities to help you understand the material and explore World Geography. The Student Resources sections has more information about how to navigate these interactivities.

World Geography Course Overview

Conclusion

SATYA: I hope you are ready for a busy and exciting year. We look forward to speaking with you again soon. Goodbye!
