

Course Assessments

World History II

Directions for Authentic Assessments

Each module has an authentic assessment. The intent of this assignment is for students to put together all of the information they have learned in a particular module and demonstrate their mastery of the content. Each authentic assessment has a grading rubric or a checklist for students to view prior to completing the assignment.

Directions for Using Test Bank Items

Each module has a list of test bank questions. These questions can be used for a variety of teaching/learning opportunities. These questions were intended as review or assessment questions so that students are aware of the full extent to which they must understand the content of each module. The questions can also be collected and formed into a midterm and/or final exam.

Answer Keys

The answer keys are available in the course files. See the “Course Files” document on the instructor guide page for directions for accessing rubrics and answer keys. They are provided in a modifiable format.
